"Natural History is a study particularly suited to Children: it cultivates their talents for ob-  
servation, applies to objects within their reach, and to objects which are every day in-  
teresting to them."—*Edgeworth's Practical Education.*

"It is to be regretted that Buffon, with all his excellencies, is absolutely inadmissible into  
the library of a young lady, both on account of his immodesty and his impiety. Gold-  
smith's History of Animated Nature has many references to a divine author, and it is to be  
wished that some person would publish a new edition of this work, purified from the  
indelicate and offensive parts."—*Miss More's Strictures on Female Education.*
