

went off so W.B. follow them when the bear saw W.B. they started after him and this scared his horse and it started to run thru the pines when they stopped W.B. snatched the bear go under a fallen pine log and there he stayed by this time the other

The main part of the tree was high so W.B. climbed up there and ^{climbed} the bear under the log with his arm over he held and it did not see W.B. so he shot him in the head and kill it it was fat so the butchered it and $\frac{1}{2}$

another time they went hunting W.B. was riding a horse and they went on top of a hill and the bear must have smelled them and were coming up the hill 5 of them W.B. was tied up his horse and got behind a tree and shot one of them in front they ran for his horse the bear saw him after he came back to see did he kill the bear the bear was rolling around when the bears saw him they started to chase him W.B. yelled at his friend they were after them ~~so~~ so they started running the bear chased him then they stop in a cherry bush then W.B. go up to the bush and the bear ask him and start to chase him they go to a draw that time and then W.B. finds the bear he shot he was crippled started to chase W.B. and the man on the slow mule had a hard time getting away

then W.B.'s gun was unloaded so he used the other mans gun and killed the bear when he shot the bear he was afraid to go up to the bear for a while and when did he had his gun all ready so they skinned the bear and W.B. took the hide and $\frac{1}{2}$ meat
