

Please tell the story of the fight in full here. Especially what Sitting Bull said and did. In the pictures, he is shown striking 9 different white men. Is this correct? How many coups did he strike on this war party?

Please write out the whole story of the battle from start to finish. Tell it so that I can follow it through from start to finish..I want to know what was said, what was done, how they fought, charged, retreated, and every detail. Use several sheets of paper, and get it all down in full..
