Superintendent  
Crow Agency, Montana

Dear sir:

Your kindness in securing information for me earlier this month encourages me to ask for your aid again.

I find in an old book a description of an Indian woman's horse equipment in which is mentioned the saddle, bridle, girth, crumper and "musk-a-moots." Since the name of the horse was a Crow word, it seems possible that musk-a-moots is a Crow word also. If so, I should be happy to have its meaning. I thought maybe it might refer to one of those fancy buckskin saddle bags.

Cordially yours,

W. S. Campbell
