

Might be. That might keep 'em back. Boy, they got lot of them dams in, ain't they?

Third man's voice: You bet they have.

And still putting in more. They've talked about damming this Illinois River.

Third man's voice: That would be quite a job for 'em.

(They can do anything now.)

Well, I think they--do they have one down at Gore now?

(Yeah.)

Cross the Illinois River down there.

(Cross the Arkansas River.)

Yeah. Yeah, Arkansas.

(Well, they got Tenkiller Dam. It runs through the Illinois. That's what stopped the eel from coming back up.)

Then this here Fort Gibson Dam.

(That's another one that stopped 'em.)

Them's big dams too.

(You bet 'cha. And that Grand River Dam that stopped it too. You want to see that eel, I understand that they spawn out in the ocean and then they come back up into fresh water. And hit those dams and that's as far as they can go.)

That's right.

(That's one of the things that's changed along with many things, I guess.)

Yeah, yeah, that eel is good fish. Yes, they are. (Static.)

(Words not clear.)

HANGING FOR MURDER - A PUBLIC AFFAIR

I was just a kid of a boy. I heard of 'em when they stuck a man in for
