

Indian land?)

Oh, yeah. Yeah, it was all on Indian land.

(Well, did the Indian benefit by it?)

Yeah.

(Well, that's good then.)

At first they got ten per cent royalty. Now, I think they got it up to fifteen. and I don't know what they get now. Course there ain't too many of them that's running.

(Yeah.)

They mined all the good part of it out. Left all the rest of them then.

(Yeah. Yeah, I've heard a lot about Eagle Pitcher. But I never knew really what they was doing. Well, they had a--they've got a big mill over there now. I think they run it but the peoples that's sub-leased the ground. Partly you might say.

(Yeah.)

And they had a cellar. (sentence not clear) They sent it down there.

They put it out. And they did say they were going to stop that big mill.

But then I was talking to a fellow here this summer. And he said he was still working there. He said, he's been working there several years.

(Well, look like if there's lead deposits in this country they'll keep mining it. Because there sure is a demand for lead. Lead products.

I took lead. I worked with--during World War I I worked with mines up there in Missouri. And I took out a lead, oh, it'll be that thick.

It's pure lead. And it'd be, oh, as long as this one. As wide, from here to that sign over there. The way we did that. We'd shoot the

circuits out from under, we generally, always run from that much up to that like that. We got that out. Shoot it out. And then we'd guide

that lead off. We didn't have to shoot it. We'd take a bar and a hammer
