

(Probably Wynnebago or Chippewa.)

I think it was Wynnebago. I'm pretty sure it was Wynnebago. He worked for Smithsonian Institute. And Smithsonian Institute sent him out to Oklahoma to get records of the Indians. Just like you're doing. Yeah I think that was about -- (Interruption). (Name not clear) wrote a poem one time. And he says of all people the Indian is about the most interesting people at the present time. "A nation without a written manuscript. The ancient rites, and lore that have been handed down from one generation to another."

(Quotes this from the poem.)

(Well, this is true.)

That might be a good heading for your story. I'm going to take my shoes off.

ORIGINATION OF THEATRICAL NAME "WHITE CLOUD"

(Whod you say gave you the name of White Cloud? Was that Buffalo Bill?)

Buffalo Bill.

(Buffalo Bill.)

Yeah.

(Well Buffalo Bill certainly was a colorful figure in his day wasn't he?)

Yeah, he was. Very fine old gentleman. He's the one that killed Yellowhand.

And he was a scout for the Union Army. And he furnished buffalo meat for the army and also the starting of the railroads. Through Nebraska.

(You know I've always been interested in guns and I've often wondered what kind of guns Buffalo Bill used in his early days.)

Well, he first used a cap and ball. And then first pistol that he used was cap and ball. Course later days he had more modern rifle during his wild west show days. Very fine shot too.

(I guess he was.)
