

which you can sometimes take a vacation now and then or each year and go somewhere to enjoy yourself, come back and be ready to work again, but I have --haven't had that kind of a chance 'cause I thought I had to work--keep working so that I can make my payments and have little money to go back to work again for my grub, transportation so on. Speaking of transportation I'm on the road everyday about 53 miles from my house to my job when I come back I've covered 106 miles a day times five. That's over 500 miles and two hours and 20 minutes on the road everyday and so that is why I don't have much time to enjoy myself other than working, that is on my off duty 'cause I am coming home or going to work all the time, takes too much time. I do this because like said I have to be close to my church and about half between these two places that's why makes me--causes, that I have to travel like this, but I think it is all right. I have been able to put up with it, up to this time, at 55 years old. I'm getting kind of weary some though. I think we may have to move up closer to my job. I like about little over a year making 20 year service with my present company that I am with when I do I plan on retiring so that I might go fishing.

LOVE FOR FISHING

Fishing is one of the best sportsmanship that I learned and I have--used to fish every year, but I haven't fished in the past six years and I really miss it. But I have been doing something else for amusement, I didn't go to fish, but I plan on going this spring sometime and fish and fish whether I catch anything or not. But my wife says as much as I spend just going fishing buying tackle, bait and stuff like that cost us enough to buy some fish from the man that sells them at .50 a pound or up to .80 as much, up as much as .80 a pound, but she says it will be worth it to spend money like that and don't catch anything and somebody be around. With myself I, when I enjoy that I think it is worth everypenny I put in it whether I catch fish or not
