

(Fred, are there any rules connected with your bundle?)

Well, the way I learn, you no supposed to go in there with anything live. First thing you got a pet, you know. Maybe you take a pet and try to keep a pet in that room with that medicine. Well if you did, if you keep that pet in there overnight, next morning it be dead. So or anybody..there was another guy or another lady, is sleeping in your room you make you four arrows..just from common stick, you no, make bow. Just like little bow, it be small and put about four arrows in it. Just any kind, match stick or anything. Whoever it be put it on his pillow. That's the rule that that medicine has. Yea. Like you be in there yourself, you sleep in that room where that medicine. You put that bow and arrow under your pillow all night.

(Do you have to do that?)

No, just somebody else sleeping there. If it's a woman like a woman come in stay overnight with you going to sleep in the same room, cone side. You go ahead, I don't know they got ~~an~~ today. It's a stick got a bow like that like people tan kids with. Yea, it's alright that way. Like apple something fruit. Going in there with your food, like at the table, you not allowed to do that..eat in there.

(Several minutes of comments from Annie.)

(You have Louise's (Saddleblankets) here now, haven't you?)

Yea, she's supposed to get it back too. She don't have anyway. I seen her in town a week or two ago and I told her about it. Well she say I get settled down and get everything straightened out, I'll come and get it. Gertie got hers down there ain't she. I heard about Ray. You got his. What did he tell you about it when he turned it over to you.

(He told me the rules and where to put it.)
