

I get on the phone and call up there if I want anything. I want to know something I call up there. I heard now they're going to get Eddy out of there, this next election. And they're going to get Charlie out of there too. He's getting old. They're going to get him out of there. And they're going to try to get (Osage name) George Baconrind. They're going to try to get him to take that place. I said if I was him I wouldn't even look at 'em. I just shake my head. Well, you threw me out. You go get you another one. Mrs. Maker: They're sure stingy with their things up there.

Mrs. Green: I said leave 'em alone. Now Sylvester Tinker is telling around, he's going to be our next chief. But I would like to leave Paul in there though, till this money is paid out that we've got coming.

And there, we might have to go into 1970 may be long time before we get that first one. We ought to get that October--the first payment. They said we was going to get \$3,100 a head. And the next is going to be about \$8,000 to a head. And the third one is going to be about \$13,000 to a head.

Mrs. Maker: My goodness.

Mrs. Green: That's what--they was going to make three payments. But now they said the lawyers are asking for more money for that two strips of land. And they said its all rough and flood and they can't pay that. Now that's what they saying now. We own south part of Missouri and northern part of Arkansas. And said
