

(Then what happened after this bunch went to Arkansas and another bunch went to Oklahoma, when they separated?)

Well, due to the fact that they traveled so slow, see that was what they called the George Washington bunch.--that was up around Arkansas.

(Oh, yeah)

They still living, that was Sally Washington and the rest of them.

Joe ... Washington. See, he was the chief of the un, Kaimachies.

They still call them Kaimachis. That's the way they refer to them.

There's no difference. They're just a band. Their name derives from where they were located.

(Yeah, I see.)

THE CADDO DURING THE CIVIL WAR:

(Have you ever heard about what happened to the Caddos when they were in the Civil War? Is there a story about that?)

Oh yes, they worked for the union, and they helped free the slaves.

And they were because from the uh, because my grandmother told me--she was one of the cooks for the union soldiers. And she said they built them a big stockade, kind of a --she said they hollowed out a place so big. I don't know how big, but she just said it was a big place.

And then she said they put wooden stakes all around and then they lined it with uh, hides. And then that's where all the different rations were supplied.--Were issued to them. And there only 3 women. That was my grandmother, Sabedoka, and Old Lady Whitebread, Luck Beaver that were capable. Because they had to test them. They said the captain came and tested these women if they could get on a horse, you know, just on a mement's notice. And they always had horses tied around close, and then they had to know how to carry a gun because my grandma could load a gun quicker than--see they lused that musket gun. And that's what they had to have.
