

it. But they all got the same name. If you have a child, got (not clear) have the second or third child, he gets the name or on down the line. But the only thing, if it's a man, your children have a girl, they got name too. It's out of our deer clan, but when they get married they don't get deer name, they have to get--go by the other side. Whatever clan he is, their turn to go to that name over there. If he is bear clan, she gets the bear clan name.

(Oh, if I had a daughter, and if she married into maybe, let's say, a bear clan, she'd be in the bear clan.)

Yeah, in that name.

(Oh-h-h!)

They go by what the bear does. Bear goes walking in the night time, looking for something to eat. They get name like that.

(Her off-spring would be in the bear clan.)

Uh-huh.

(But if someone married my son, they would be in the deer clan.)

Yeah.

(Just like--just like now who--this is kinda like they don't do it hardly much anymore. They use to have name when you were born.)

Yeah.

(Then when you become a man they have another name?)

Huh-hum. That's the same thing. They got name for that too.

(Who gives those names?)

Well, an--long time ago, you know the old persons in your clan--old person..

Just like I say when have ceremonies where they name you. They go through different ceremonies when they get through, they give you that name. They give you that name after you get old; they carry that the rest of their life.

(Just like me. I wanted to give my boy a name. He's grown-up now. I get someone from my clan?)

Uh-huh.
