

it's coming up clear up to my neck. It's just about chokes me, you know, course, I believe in the healing part of it. I believe in that, but the other part, you know, I don't know cause when I was in there, well, I know I wasn't saved or anything like that. And I was just like, worried, like anybody else, but this time, well, my father says, I must put up a meeting. I want you to go in." I been to a meeting before, but you know, I don't sing or anything. I just sit around and look around, you know, watch. But this time, I went in as a patient. He said, "Sit over here where the sick folks are." I sit on the south side. I was just sitting there looking around, you know and after midnight, well, he gave me, I believe, four. That's all I had. He says, "Don't take anymore. That's all you need." So, he just gave me those four, and that was all. After that settled, well, I was all right. I was looking around after midnight, I drink water, and then (not clear) was going another round, you know. And I was looking around. And my father kinda made a, made some kind of a sound. And (clicking sound) just went like that. And I knew it was him. I look over there. He pointed to the peyote, you know, on top of that moon, you know. And I knew what he meant. He must want to look at that thing. That's what I thought, you know. So, I was telling myself, straighten myself in the seat so I can be comfortable. And I watch that thing, see what's going on. And the rest of them, they take out their feathers, you know, those pretty feathers, eagle feathers, all kinds of feathers, scissor-tail feathers, you know. And I was watching that. I can see those things, just (not clear) you know, come on down. Yeah, that's part of the faith, you know, I guess that it had, you know. When a fellow looks up, well, there won't be anything like that, see? But I guess I was just to give them trouble, I just kept watching that, watching that thing, you know.
