

(Did you know any women then who had miscarriages?)

No.

(What position were you in then, when you first had the baby, were you just laying on your back, or how?)

Oh, I was laying on my back.

(Well, what did the three women do then?)

Oh, they just have to sit around until I have it.

(Did one of them stay up front with you?)

Yeah.

(What did she try to do just...?)

Just wait until it comes.

(No, I mean while it was coming what would they do?)

Oh, they just had to sit there until it comes.

(Did they each have a special job when it came?)

No, they all work together.

(Did you say they cleansed him with warm water?)

Yeah, wash him with warm water.

(Then what would they do with him?)

Oh, they just wrap the baby in some kind of cloth, blanket, and wrap it up.

(Did they have any special tools to help them?)

No, they just used their hands.

(Did they have stories about when the best time was to have a baby?)

No.

(Was there anything special they would do if the afterbirth was slow in coming?)
