

Woman: Boy, you sure are looking jazzy today.

Man: You want to find out just how much--?

Woman: I might hurt you--

Man: The ass of your always just makes me get hard.

Woman: Go ahead if you think you can do it. I bet I could kill you right now.

One of the main things they do to each other is throw them in the river and throw water on them.

A woman might tell her brother-in-law: "Oh, you sure got a little one!" (Or a big one.)

Sometimes the woman would just grab their brother-in-law and just strip them. Pull their pants off, or their G-string or throw water on them. Or just one woman might do this to her brother-in-law. They would fight back. But maybe it was dark and they wouldn't fight back.

When a woman and her sisters were together with her husband, that's when they'd do that nasty teasing. Sometimes a woman would get jealous at her sister. Same with men, if they see their sister is going too far.

A man would tease his sister-in-law by raising her dress up. And that time they don't have no pants, or bloomers. Some girls used to have babies from their brother-in-law. They would get pregnant and blame their brother-in-law. It was single girls who would do this. Then their families would make them marry. Some men had four or five wives. A woman had nothing to say if her younger sister got pregnant from her husband. They used to help raise the little bastards. They didn't used to have hard feelings against one another. A man had to claim his sister-in-law for a wife when they did that.

Usually they just teased each other and sometimes the teasing was pretty nasty. But they didn't usually go so far as to have intercourse.

BROTHER'S WIFE/HUSBAND'S SISTER RELATIONSHIP

(What about a woman and her sisters-in-law--like you and your husband's sisters? How would you treat each other? Would you ever tease or joke or anything?)

Oh, yeah. We used to tease. But my sister-in-law, she used to get mad. She never did tease much. Some of them is like that. They don't like teasing or anything. I never did tease my sister-in-law.
