

there where Amy lives down on the bottom. The tree is still there where the cabin was where I was born.

INDIAN TREATMENT FOR POLIO:

(You mentioned once that you had polio when you were two years old.

Could you tell something about the things that happened when you had polio. Do you remember how you got it and what treatment was done for it?)

Well, uh in about 1903 my grandmother insist that she take me to..she had gone to a dance and in the meantime they got word that my great grand aunt had passed away so we went on over there while thy were attending the funeral. Several of us little ones were playing around and where we were playing there must have been something there and that's where I caught it. That was about the latter part of..I guess right around September of 1903.

(Did anyone get an Indian doctor to take care of you?)

Well, they...that is my mother took care of me cause she was a doctor herself cause my grandfather handed down a lot of the different...and now they praise Sister Kinny. That's what mother use, she used palpitations. And of course I wasn't able to get around for several years, but yet after I did recover, I just practically totally recovered.

DOCTORING AND INDIAN MEDICINE:

(Did she give you any Indian medicine?)

Yes, uhuh.

(Do you remember what any of them were?)

Oh yes, I know all about it.

(Indian medicine?)

Uhuh.

(Was there any that was particularly important?)
