

(What about after she had a baby?)

After she had a baby if she...after a month he be starting again and she get caught up right this minute. Doing the same way. I seen lot of womens do that. Up today, them days you know they nurse their babies withtheir breast. Them days the old peoples says don't you let your husbands sleep with you because you got a little baby. When you get pregnant again you milk gets sticky. That's when you get pregnant again, and your little baby going to starve to death. And sure enough I seer lots of times. I seen ~~dot~~ of people they get pregnant after their babies about two or three months old, their mild gets sticky and as long as they sucking on their mother's breast, their mild gets sticky and they just get thin and skinney and they can't get that full milk. They don't have that can milk like they do today. Some peoples got cows but heck they don't even know nothing about bottles or nothing like that.

INFANT CARE:

(How long was it before a child was weaned?)

About nine months. She was the one that my mother all the time.

(Was she a doctor?)

She was only for that, you know. Taking care of a woman when they going to have that baby.

(Did they have a special named?)

For what?

(The women who took care of people who were going to have babies?)

They just call us. Take care of womans when theygoing to have a baby. That's all I know.
