

(Did she ever witch people?)

Get rich?

(No, witch.)

Oh, I don't know whether she did or not. But she claims she can. But I don't know whether she witched anybody or not. I live over there in the mountains and she live up there on a river by Fort Cobb. And I never was around there much, but I know her. And they say--Willie Horse doctor and he claims he possess that power she had. He used to be married to a granddaughter of the Old Lady and says the Old Lady transfer those gifts and power to him.

(Is he still living?)

Willie?

(Uh-huh.)

That's Cecil's brother, yeah.

(He's living yet?)

You ask Cecil about it. Maybe he can tell you.

HOW GIFTS OR POWER IS RECEIVED AND PASSED ON

(Well, I've got another question. Now, would a woman doctor give her gift the same way as a man?)

I guess it don't make any difference whether it's woman or man give it to man or woman.

(Well, what I mean is, would a woman ever go off by herself and fast and stay out by herself alone?)

Well, I never heard of any woman going but I heard claim that some of them got gifts alone like that.

(Oh, they do?)

But whether they went out purposely for that, I don't know. But several women have received powers like that--alone.
