

of Old Mexico, see the Comanches were originate in Old Mexico. So they got my grandfather over there when he was just a boy. Captured him and brought him down among the Comanches people. So they stayed with him and they reared him up and they found out that he was a useful man. So from there when the Comanches went and unite with the Kiowa and Kiowa Apaches, they were all on the war path among their tribes; comanches and Kiowas and Kiowa Apaches, they were fighting the Comanches and Navajos and all those other Indians like Osage and Pawnees and those other Indians. They had war with them in those days. Fought among themselves. They also fought among the soldiers way back there when the first soldiers that came out.

As he was a young boy they took him out on the war path they work with him. He went and work with them and fought with them and then in time, you see, whenever their food was low, well the parents that captured him took care of him just like he was their own child. Raised him up that way. When he got to be a young man he went out and hunt food, killed deer and buffalos and bring the meat in for the parents to eat it. He lived with. So when they were on way back in the Blackfoot Mountains they came on, while he was there well, he done lots of hunting lots of fighting. So he came on to northern part of Colorado back in there right on the north edge of the big mountains where they originate there. All the tribe originate there. That's when the Kiowas and Comanches and Apaches, they all unite together and they smoke a peach pipe and they become one. Not three tribes but one tribe. And they were brothers and sisters from that time then on till today. So he originate with those Comanches so finally there was some Kiowas that wanted that boy. He was a young man then but they wanted him because they see that he was useful. He was smart, brave and he was useful so they went ahead and they bought him. The Kiowas bought him. Give them plenty horses, plenty stuff to--whatever it took to bought him, they give them that. So the Kiowas went ahead and took over. When they took over, well, then they went ahead and stayed for the Kiowas from then on.
