The first / weekment is an apprecial report. Property of Joe O'Field, Cherokac 1826. Earry S. (Barrens?) inspected the subjects property March 21, 1967.

Perhaps. I should point out that the bull of this attachment is typewritten, have at this point, directly above the type written 1967, an entry has been made in long hand which appears to say re-certified as of October permips 17, 1963; the to go of, with the type written material, an areal photograph and a soil map were employed during the inspection. The next section is entitled neighborhood enalysis, economy, access, location, utilities. The subject property is located approximately 5/8 miles SW of Kansas and M miles S of Jay, Oklahoma, the county seat of Delaware County and the chief trade center of the area. Jay has an estimated population of 1,200 and also has adequate shopping, multiting, social Tacilities. Utilities and services such as RFD, public school les, electrical power and welephone are available in the vacinity. Access is a milable on the N. side of the NE 10 acres by highway number 33 and along the W. 30 acres in the SE 10 acres by a county road. The comony of the area is basid on agriculture. The principal source of agricultural income is the sale of livestock. economy is supplemented by outside caployment of dilferent kinds. There are no adopors in the economy which will change the highest and best use of the property in the foresceable future. And the next column is headed, Augrability, Charac Topography, Climatic Influence, Use. The highest and best use of the property rural home site and pasture due to its location. Physical characteristics of the light and the present use of the subject and surrounding properties. The proper contains approximately 9 scres of open pasture and 73 scres of wooded pasture. The soils of the vooded pasture range from a Charty upland lots to a valley 1 \$6 inches deep occurring on clopes of 1% to 3%. The woils of the open pastire Charty to valley loam 30 to 36 inches deep occurring on slopes of 13 to 45...13 root high line trayerces 2/3 or the H. part of the H. 10 acres from SE to HH. Vegetative cover on the vooded area consists of oak and elm with an unimprotory annual and native grasses in the thirty wooded area. Vegetative cover on the open area is principly annuals and lespedeza, and native grass. The stock water supply is adequate and consists of Spring Creek, That traverses the S 40 acres from NE to SV. The climate of the area is classified as semi-humid with an ave rainfall of 44 inches and an average growing season of 214 days. The property partly fenced with 3 and 4 barbed-vire wire on native posts in fair condition. land is not leased and has no structural improvements.

Second page, also headed Appraisal Report, Joe O'Field, Cherokee 16526.
