trying to get some way to see if I can get in touch with them. So, therefore,

I went ahead and stayed there for that reason. I talk to the Great Spriit but

there wasn't no word sent to me from no way. So, I came on back.

(What was the name of that lake by the way?)

I don't know what the name of that is. Got a big sign up there though. Ever

get into western Montana, you'll find that. Got a big name on it. Got a big

poster on there. And they got a fence over there today. Way up high there

and they big as these big yard fence that go around you know, big ones. They

got that kind, but only they tall. Way up there and they stout. And they got

an electric outfit come around there and nobody can't try to go in there. D

Dangerous for anybody. That water is pretty dangerous to go in there. They

got it closed up and they got that thing on there. Nobody can't get in there.

But you can see, if you come around down there. They got it close enough to

see where those tepee poles are still there yet. The tracks are still there yet

and the tracks of those people that went in there, the tracks are there yet.

And the dogs and horses, everything went under water. Everything, all their

belongings. And that's the truth, they went in there, and it's over there today.

It's there today. So, several years after that, several years after that, they

went ahead and they moved from where they were originated. They moved farther

north from where they lived, they went farther north, I don't know how far, or

what the name of that place, but they went on further north, quite a ways. And

they originate there for many years. Finally they dedided to go ahead and move

back further south, further south into the - - right south of the Kiowa country.

They want to move away from that tribe. Stay around there and see what they

could find, whatever it could might be, you know. They might run into something,

might be valuable, to the tribe and the people. So they originate there for

many years. They roam from one end to another. They move from one place to another
