

me with that with a eagle feather.

(Did he just doctor with peyote?)

No, he's got other medicines. These are the medicines what I got is from him. Did you ever go--what did you do with that Rock Medicine?

MEDICINES:

(I still got it.)

You never did find out about it?

(I got the name of a man I got to see but he doesn't get back until school starts. So I still got it, and I'll bring it back to you.

But I got to--in September when he gets here I'm going to take it to him.)

See what it is.

(That might be a good thing if he can, you know--he studies that kind of thing and he might be able to tell me so I can tell you maybe where there might be a lot more of it. If he can decide what he thinks it is, maybe he knows where to get it.)

After a little later on, there be a lot of it after the weater--it be through with it you know. They're still packing it, those little bees on the rocks. After awhile there'll be a lot of it.

(When do you usually go out and get most of your medicine?)

In the fall.

(What kind of medicines do you think you'll get up there on your trip? (referring to trip she will take into Nebraksa, Wyoming.))

Oh, there's some medicine up there--up there at the--they get it on the mountain side, you know, way up there. They said you have to

go real far on the horses, ~~road up there~~ ^{I mean car} and stop when they can't

drive no more and then they ain't got no road up there. They just

have to follow old trail up there and when they get up there they

got a trail there and have two or three horses. And a couple of cars
