ment, but give them a chance to do for themselves. We didn't do that. We just gave them an allotment and, "Now there's your allotment, now you can't sell it for 35 years", as we allot to each person (--) "You can't sell it, but you can lease it." Now we have government agencies in the local areas that handle the Indian problems, but even they do not really offer any encouragement to the Indian farmers of the land. They jest see that he's not cheated to much by the lease, who leases from him and encourage the Indian to charge as much for his lease as he can get. Well, that's all right, because they are in a position to know about how much that lease should return.

(Do you think then, that the white man is responsible for molding the Indian?)
Well, our, yes I guess you can say that. I hate to lay all the blame upon the
white man because the Indian as, jest a native son, and he does what comes easiest
jest like most of us do. And if he can make it easier by sittingin a rockin' chair
you gean do it. Not many work for work sake, white or Indian.
