

fellow down here at Garber, he's a good friend of mine. His wife died since mine. Though he's a younger fellow he married quick and his wife had a lot of leases. He's got out and he's got leases. He's got alot of 'em--scattered around. I know the fellow mighty well. (incoherent) But he just 2 of his leases. Southeast of there He just gets so much food, he just can't eat it.

(Who raises the prices, \$10,000 to \$5,000?)

We got a bunch from the office. Come out and pay them \$10,000 to \$15,000. Put 'em on lease occasionally--lot of them now for \$2.00 though.

(Do you think they put fair price on it?)

Looks to me now like I ain't leasin' the land around here, I don't see how I'd make any money. I don't see how there going to make any money. (--) North of here--no theast of here they have some Caddo Indians, these Kiowas here, and north of the river I think is the Apache Indians. That's northwest across the river but there all high, every plat-gum one of 'em. Leases.

(What do you think, well happened, for them to keep on raising price?)

Well sir, I don't know I don't see how they could, do you? I don't see how they make any money off of this.

(I don't either. Well, I don't either--\$2,000)

Yessir--

(Is that for a 180 or 160?)

160. I can take these--I know 2 down here. Our old boy Leon Walters, he got bunch of leases down around Mt. View scattered all around.

I seen the other day he was talking about Ben--at them Indian leases, and I know him good you know. Let them high price Indian leases alone.

He can do all right.
