

things there well--and this fire then on that track that I was telling you about that fireplace they put a little narrow line right on top of that, right on edge all way around. That's the road. Then say He got over when you start, when you goin' you start on that road.

(You go right across that round track?)

Right around that moon track.

(Moon shaped? Uh Huh.)

Now that peyote is settin' half--settin' right in middle of that. Well, that's what I been talking about that half way mark. See, It's half way. Settin' right there, and the fireplace is this way, and settin' right in middle. So, that's why I say he go half the way--

(Uh Huh, it'll take you the rest of the way?)

Yeah. After you pass through that medicine, then you goin' on down hill, then you say you get 50 years old in there. Then you goin' down the hill and you agin'. So when you go 'round there why they all go round this way.

(From left to right. Clockwise?)

Yeah. When they go out and get up from here, well, they go out that a-way.

(Always that way. Comes in that way too?)

Yeah. When they come in--

(Come in they turn to left and go around?)

If they settin' over here and go out and come around, go set down back over there. So, that's one of them things they do about those things and they whistle there and the drum and the gourd--that's what the old people had way back before this new. So, we got 'em in there, feathers and everything we got in there. Tobacco, we got 'em in there. So that's lots to catch up with that if you get a chance to go sometime, well go. We goin' to have on 23rd. Now if it's possible and you can, why come over and set down.

(Can I come over?)
