

clean and we began to get married instead of just taking up with each other.

MANY OF THE STUDENTS HAVE DONE WELL SINCE LEAVING SCHOOL

Now, I had some smart youngsters about that time, and some of the boys, they finished here and went on to high school and finished high school. They didn't go on to college. They didn't have any way to go. I'd try to find them a way, but they went to work. I have about 18 boys, who are men now, that are lead-men over here at the North American. Then I have one boy in Ohio, he's working for Akron Rubber Company, and he's rated way high. I think he's vice-president or something up there. And then I have about 3 outstanding teachers in this country. I have one at Pryor, course that happens to be my daughter, she's is considered on of the outstanding science teachers, in high school. And she's made the Who's Who, in two or three books. And I have another girl, up in Missouri, I believe, who is considered an outstanding primary teacher. There's several around the country. I couldn't name all. But I have some boys in California that are working with these defense plants. Most of them that have been out on the job for, say five years, are bosses. They make good leaders. I'm told that by these companies. Our school then grew. At first they didn't care whether the kids went to school or not. I'd jump on these women about not sending their daughters to school. And they told me that their daughters didn't need to learn to do anything, only just diaper a baby, that's all they was going to do anyhow. And I had to change that. To the present time, all of them going down to high school now. And then the boys got to coming to school regularly. And since we've had a truant officer in the county, he's only been used one time in the last ten years. Kids are in school everyday, and they enjoy school. They want to come to school. They want to learn. And I have some outstanding youngsters in different things here, that is, kids
