

maybe that's what I was talkin' 'bout. So we lost all that land and we were there, that was our territory. Even where they call Osage City up there, they got big Stockade in all this town, got it all fixed up they got Indian Osage pictures up there and all about Osages. They even pushed us out of there, I think. I don't think we got a place to walk. And that's why I said we didn't have anyone to stand up for us. Represent us. Because they can't say they represent us and that's the trouble. Now that's the problem we got now, that's what's gonna bring it to show-down. Is now when we get this money for this twelve million acres, we gonna have to--somebody is gonna have to have a say-so 'bout it and this council won't go in there and say it. Now that's what I say. I might be wrong, but they sure gonna have to prove I'm wrong and they--just like they couldn't say anything up there, because they just keep pushin' 'em out--pushin' 'em out and so they --I don't know how they gonna do this. They filed the briefs on these other two claims and it's under the million acres they filed. I know there's over a million down here by Arkansas and Oklahoma. That's one and others is here. But the Osages, they owned this land by, all these years they been easin' it and then these Omahas why they got the same kind a claim on that Iowa, Iowa land and on up towards Wisconsin. They got a claim on that just like this here. They used it for hunting grounds well, it's still printed. I don't know how they gonna make it. So, that's the way that was. And then them Cherokees they say they owned this. They didn't own it. We've got some we already owned. We are the ones that owned it.

( Well, then that's their main complaint that they own it. Then the government took it away from them and give it to the Osage. ( child making so much noise this part not clear)

Yeah. We bought it.
