

Now you take a peace pipe, that's where it goes. See? Well, that's the way they're sitting up in the sky. The girls--they in a circle. No, they just moves on. They're not--.

Jenny: They not in a circle, just together.

Cecil: Just like that, you know. All together though. The Star Girls. I see them in the morning. I know that.

(Do you know when you see them?)

Cecil: I know. I'll point you out to them.

(I'll have to come out and spend the night some time.)

Jenny: When the stars are out bright, you could see them.

(O.K.)

WEATHER FORECASTS WERE DONE BY SUN, MOON AND CLOUD CONDITIONS

Cecil: Now if you want to, it's hard to tell. Here's the moon. That moon's got a circle. If you notice that sometime you go out and there's a circle around the moon. Then there's another circle and another circle. It gets bigger and each one of them circles around that moon means hot weather, cold weather or wind. \ But that's true.

Jenny: We don't quite understand that. That way they used to get that weather long time ago.

Cecil: There's a sun here. And they have a sun dog here on both sides. If you notice sometime the weather, it gets kind of damp or something, you look up there and the sun will be a color--all colors. On the north side and the south side--and they call those sun dogs. And that means something. If they closest to the sun, well, that means that the weather will have to make a change. Now they have no calendars. They had no calendars at that time but they always studied the stars for their weather. Now my father,
