

away that has fixed something for somebody, it's really strong. And it's really hard to get out of it. You have to really, really work and use the medicine and use a lot of it - maybe for six or seven months without - without running out of the medicine - you have to go back 'fore you run out. And I really do think he's done it. But of course he's good to me, Faye. He hasn't been mean to me and he thinks a lot of my little boy. But it's just the idea, I guess. I mean, I sure would hate to do somebody that way my own self, if they couldn't love me of their own free will - I don't know I just wouldn't want them, I don't guess. I guess he must really want me that bad or he wouldn't have done it. And I went to the medicine man, like I said, and he told me that he'd done it. He could tell by reading the fortune. So, now I know that he has done it and everything, so I just don't know what's gonna happen.

CLANS - INDIAN DOCTORS NEED THIS INFORMATION

(When you go to that Indian doctor, does he ask you what clan you are in?)  
He sure does.

(Then they can check with that clan?)

Yes.

(It helps if you know which clan you are from, doesn't it?)

That's right. In fact, it would be more powerful if he knew which clan the person was that you are conjuring. I mean it would work a lot better. And they do go by the clans. It's a lot stronger if you knew the clans. Of course, there's not too many people that would go around telling everybody what clan they are, either. The only reason - the only reason you would tell anyone of your clan if if you were trying to get medicine to help yourself or something, or try to get somebody - you'd have to know your clan and their clan. And even the white people have a clan, that I
