This extraordinary book is dedicated to a very special group of people. Years ago they were called healers. Today, they are known as health care professionals. But in the true sense of the word, they remain healers.

*Medicine's Great Journey* is a photographic celebration of the people and events that have made this century an unparalleled time of discovery and progress in healing. The book combines milestones in 20th century medicine with a personal memoir of healing, featuring photos of doctors and nurses from the past century.

The stars of the book are the caring and compassionate doctors, dentists, nurses, researchers, pharmacists, midwives and other health care professionals whose dedication and commitment made possible the remarkable history in medicine during the 20th century.

Schering Laboratories is honored to sponsor this very special book...and proud to share it with you.
