IBELIEVE IN

and will WORK FOR ... PREPAREDNESS

America must always be sufficiently prepared to:
1. Meet the everchanging and shifting conditions of the world.
2. Achieve a lasting peace if possible.
3. Emerge victorious from war if it should be thrust upon us.

PRODUCTION

I believe in the opportunity for unlimited production with a proper parity formula to guarantee good prices for the farmer, and for opportunity for full employment at good wages and with good working conditions for the worker.

PROGRESS

Conservation for Oklahoma is dependent upon:
1. More conservation and rebuilding of the soil.
2. Fuller conservation and use of water.
3. Better living conditions on the farm through completion of rural electrification.
4. Farm to market roads and equal educational facilities.
5. Better opportunity for every citizen to prosper and achieve lasting security.

PROSPERITY

I believe general prosperity and well being can be achieved for farmers and businessmen alike through soil and water conservation and reclamation, rural electrification and better educational opportunities for all the children of all the people.

PEACE

I believe a just and lasting peace can be attained through adequate preparation for defense. A pacifist, vacillating America cannot lead the world into an abiding peace. Therefore we must be stronger than ever before.
