Building for a Greater Oklahoma

Oklahoma in 1929 produced one and one-half BILLION dollars of new wealth from agriculture, manufacturing and minerals . . . . the three almost evenly balanced. Closely identified with this remarkable production is ELECTRIC POWER, generated in efficient central power plants and transmitted over wide areas to farms, industries and oil fields, at constantly lowering costs.

Providing dependable, economical electric service in a courteous manner . . . taking a substantial part in progressive civic affairs . . . and assisting in the development of Oklahoma, are fundamental policies of Oklahoma Gas and Electric Company. Three thousand Oklahomans . . . members of the O. G. & E. organization . . . are the human media through which these policies are earnestly practiced . . . ten thousand Oklahomans are shareholders.

Oklahoma Gas and Electric Company

J.F. Owens, Vice-President and General Manager
