POST-GRADUATE QUIZ
(Answers to the quiz on Page IV. of front advertising section)

1. Ellis Island.
2. Calvin Coolidge, Governor of Massachusetts, in Boston, in 1919.
3. Cuneiform writing.
4. The hard skeleton of certain marine polyps.
5. The installment plan.
6. Belladonna, or one of its derivatives.
7. "Every day in every way, I'm getting better and better."
8. The British soldier.
9. (a) Massachusetts, (b) New Hampshire, (c) Iowa, (d) California, (e) Kentucky.
10. A pagan.
13. To determine the degree of intelligence of the person tested.
15. Old Dutch Cleanser.

Please write your quiz score in space provided in coupon on facing page, and mail today.

16. Clarence S. Darrow.
17. Exempli gratae ("for example").
18. Ex libris (in Roman history, a bundle of rods with an axe in the center, carried by a lictor as a sign of magisterial authority).
20. A wading bird of the heron family.
21. Flex.
22. Rustlers.
23. He was President of Princeton University from 1902 to 1910.
24. A person or an organization that for hire undertakes the conveyance of goods or persons, inviting the employment of the public generally.
25. Ivory Soap.

The broad highways of travel lead inestimably to certain great cities and certain great events. The grandeur of a Coronation in London...a brilliant International Exposition in Paris...exert their attraction on experienced travelers and neophytes alike.

But afterwards, when the captains and the kings depart, and when you have absorbed all that even a Paris Exposition can offer, you will be wise to leave the beaten track. To visit such ancient cities as Cahors and Moissac, Perigord and Angoulême...to sleep in an inn 500 years old (but well scrubbed and well provided with succulent food and sound wine)...brings you somehow near to the living heart of France...and to a better understanding of the Gallic spirit.

And, in a Breton or Norman seaport, when the fishing fleet comes in and the wide-shouldered, keen-eyed sailors swing along the quay, you understand more clearly the tradition of discipline and courage which has made possible the French Line fleet.

This is a good year to go abroad. Exchange is very favorable, and Exposition visitors benefit by special reductions (50% on railroad tickets, for example). Ask your Travel Agent for early reservations.

IN NATURE'S PATH

A good deal of what we call invention is imitation of nature.

The aeroplane is a man-made bird. The submarine is a mechanical fish. The locomotive has been called "The Iron Horse."

So countless objects follow nature's pattern, and in the matter of mechanical principles there is little for anything we know which wise Old Mother Nature has not always practiced.

What we create in scientists and engineers is, then, not so much their ability to create things essentially new, as their skill in searching out old but hidden principles, and their remarkable ingenuity in applying these principles to new uses.

There are very few more interesting examples of this skill and ingenuity than the modern automobile.

And there are very few more skillful "imitators of nature" than are represented in the many and varied functions performed by the thousands of parts that go to make up a modern motor car.

There is the basic function of movement. Hence, wheels, and the gearing of power into the wheels.

There is the function of changing direction of movement, and that of moving over various surfaces, on level ground, uphill and downhill.

There is the necessary ability to stop movement. All these require such devices as steering apparatus, brakes and methods of controlling power and speed.

Then there is the function of carrying passengers, and this involves supplementary functions.

One of them is to provide comfort for the passengers, . . . to minimize the shocks of travel which would otherwise result.

Now nature, too, has had the problem of producing shockless movement. In the human body, for example, many devices are utilized toward this end.

First, there is the soft padding of the soles of the feet—the cunning arrangement of the foot arches—the manner in which the ankle is constructed, next, that important factor—the structure of the knee. The easing of shock is also served in the fitting of the spine to hip bones, and thence to the legs, in the marvelously efficient spinal column itself with its cushioning pads of cartilage between the vertebrae, in the manner of balancing our heads on our shoulders, and finally, the muscles, ligaments and tendons employed as an elaborate system of springs and shock-absorbers.

Now see how automobile construction parallels nature's plan:

One of them is to provide comfort for the passengers, . . . to minimize the shocks of travel which would otherwise result.

How to see TWICE AS MUCH on your trip to California

It's as simple as A, B, C.

A. Look at Southern Pacific's Four Scenic Routes to California, on the map below.
B. Pick the two routes that interest you most.
C. Go to California on one of these routes and return on the other. Result: you see a different part of the United States each way. You see twice as much of the West as you would by going and returning on the same route... and from most eastern and mid-western points it doesn't cost you one cent more rail fare!

FINES TRAINS. On Southern Pacific's Four Scenic Routes you'll ride the West's finest trains: Overland Route's distinguished Overland Limited and the streamliner City of San Francisco; Golden State Route's luxurious Golden State Limited or the new California, a fast, economy train with 25c, 30c and 35c meals, stewardess, free pillow service, etc.; Sunset Route's romantic Sunset Limited and the Shasta Route's Cascade. All these trains are completely air-conditioned, famed for their fine dining car service and their atmosphere of western hospitality.

Between Los Angeles and San Francisco, you can ride the new Daylight, most beautiful train in the West.

LOWEST FARES IN HISTORY! Southern Pacific spring fares, now in effect, are the lowest ever offered at this season. For example, $57.35 from Chicago to California and back in air-conditioned chair cars; $58.80 in air-conditioned tourist sleeping cars (plus small berth charge); $85 in air-conditioned standard Pullmans (berth extra). Low summer excursion fares start May 15.

FREE TRAVEL GUIDE. Plan your trip with our new booklet, How to See the Whole Pacific Coast. It describes our Four Scenic Routes and the Pacific Coast. More than 80 big pictures. For your free copy, write O. P. Bartlett, Dept. GR-4, 310 South Michigan Avenue, Chicago, Illinois.

NEW "SUPER-DUTY" FRIGIDAIRE WITH THE METER-MISER
Cuts Current Cost to the Bone!

Only Frigidaire has it!
Instantly releases ice-cubes from tray. No more carrying to the sink, splashing under the faucet. Yields 20% more ice by ending melting waste! All ice trays in every "Super-Duty" Frigidaire have this Instant Cube-Release. See its quick, easy action at your Frigidaire dealer’s.

Don’t be satisfied with just one or two seemingly attractive features in the refrigerator you buy.

Demand Proof of All 5 Basic Services needed for complete home refrigeration. You get it in the "Super-Duty" Frigidaire with the Meter-Miser.

See the Proof at your nearest Frigidaire dealer’s store. See for yourself how Frigidaire does a “full-time job” in making, storing and removing ice-cubes. Test the marvelous convenience of its 9-Way Adjustable Interior. See how miserly Frigidaire is with current, yet how safely it protects food even in hottest weather.

Yes, get the Proof! Don’t be fooled by mere claims or superficial advantages. To get years of satisfaction and saving in the refrigerator you buy, see your nearest Frigidaire dealer—today!

Buy only on Proof of Super-Duty

**PERFORMS ALL 5 BASIC SERVICES YOU NEED FOR COMPLETE HOME REFRIGERATION, and PROVES it!**

**Proof 1**
Greater Ice-Ability

Ends “Cube-Struggle” and “Ice-Famine”!
At last, the refrigerator that instantly releases all ice trays— and all cubes from every tray, with the New Instant Cube-Release! Also freezes more pounds of ice—faster ... stores 100% more ice-cubes ready for use! Most complete Ice Service ever known.

**Proof 2**
Greater Storage-Ability

New 9-Way Adjustable Interior! Good-bye to old-fashioned crowding and dish-juggling. Now you get maximum shelf space up in front. And Full-Width Sliding Shelves, Cold-Storage Tray and Super-Duty Hydrators, ALL adjust like magic to suit any size or shape of food! Most complete Storage Service ever known.

**Proof 3**
Greater Protect-Ability

Keeps Food Safer, Fresher, Longer!
Safety-Zone Cold in food compartment—proved by new Food-Safety Indicator with Dial on the Door, always in sight. Plus MOIST Cold for vegetables ... EXTRA Cold for meats ... FREEZING Cold for ice cream and frozen desserts. Most complete Protection Service ever known.

**Proof 4**
Greater Depend-Ability

Five-Year Protection Plan, backed by General Motors, on Frigidaire’s sealed-in mechanical unit. This, together with Frigidaire’s Sealed Steel Cabinet, Special Sealed Insulation, and Lifetime Porcelain or Durable Dulux exterior, all adds up to the most complete Depend-Ability ever known.

**Proof 5**
Greater Save-Ability

Only Frigidaire has the Meter-Miser
Cuts Current Cost to the Bone

Meter-Miser does Super-Duty at amazing saving, for it’s the simplest refrigerating mechanism ever built... Only 3 moving parts, including the motor... permanently oiled, completely sealed against moisture and dirt. You see its lower operating cost proved by an electric meter before you buy!
The child who stands listlessly watching while other children romp gloriously through the clay may simply lack enough of the right kind of food. Expert dietitians say every child should have an abundance of wholesome meals, and Pasteurized milk is the safest of all.

A listless child — proof of energy? Children need plenty of safe dairy products.
