An idea grows from one mind to another. It may begin with nothing important. Just a word. Or a notion. But as each succeeding mind brings a fresh viewpoint, the idea begins to grow and mature.

If you like working in an atmosphere that breeds ideas, you'll like working at Northrop. Stimulating minds and stimulating projects are all a part of the climate here. We have more than 70 active projects in work, and we're constantly evaluating new lines of inquiry. Projects cover such fields as interplanetary navigation and astro-inertial guidance, aerospace deceleration and landing, man-machine and life support systems for space, automatic checkout and failure prediction systems, laminar flow control techniques and worldwide communications.

For more specific information, see your placement counselor. Or write to Dr. Alexander P. Weir, Northrop Corporation, Beverly Hills, California, and mention your area of special interest.

An Equal Opportunity Employer.
