Purity is the one most important quality in milk that the consumer has a right to expect and to insist on. For milk that is to be used by babies, by youngsters, by every member of the family -- you want assurance of complete protection for purity. That is why the Gilt-Edge Company has adopted the DACRO system bottle to safeguard milk after bottling and during necessary handling and delivery. Here are the outstanding advantages of the DACRO System:

1. TAMPER-PROOF SEAL. The top is securely locked in place on the bottle.
2. PROTECTED POLYRING LIP. No hand can touch the top of this bottle, regardless of how it is handled.
3. SMOOTH BOTTLE NECK. No inside cap seat. Easy to wash and sterilize.
4. EASY TO OPEN. The Dacro cap is easily removed with the Dacro Opener which we provide.
5. EASY TO RESEAL. A light pressure of the hands snap the cap back into place.

The Gilt-Edge plant insures the purity of the milk it delivers to you by pasteurizing it to make it safe, by using only the most modern equipment for handling and bottling, and by using the modern Dacro system to protect the milk after bottling.

Protect the health of your family by insisting on Gilt-Edge dairy products: whole milk, cream, buttermilk, butter, cottage cheese, chocolate milk, ice cream and other dairy products.

Insist on Gilt-Edge Products: Pure, Inexpensive and SAFE.
