Milk is almost universally as the basic health food for both children and adults, but the value of milk and other dairy products depends to a large extent upon the careful and scientific handling of the milk all the way from the dairy farm to the consumer.

In Norman the label "GILT EDGE" on milk, butter or other dairy products provides full assurance that what you are buying has been handled by tested and approved methods, and that all health requirements are fully and cheerfully complied with.

Yes, there is a difference in milk, and it pays to be sure that the dairy products you give your family bear that label "GILT EDGE."
