As any sensible person knows, there's no need in running up large grocery bills and buying expensive foods, when all the requirements for a proper diet can be found in the more reasonably priced realm of grocery items. Milk, for instance, costs very little yet contains so many of the vitamins and minerals necessary to maintaining good health. It's easy on the pocketbook.

Along the route to Tokyo - 13,147 miles of tracks serving the Southwest - Santa Fe, as the map below shows, is an important lap on the "Route to Tokyo." That's why, during the past several months, travelers have seen armies of "Men at Work" all along our lines. Capacity of our yards has been increased. Curves have been ironed out so trains may get around them faster. New Diesel "headends" are pulling bigger loads up mountain grades. Ingenious centralized traffic control systems have been installed at important points so the same rails can carry 50 percent more traffic.

A new Santa Fe bridge is now being built across the Colorado River. We have enlarged our capacity to meet the increasing loads of war. There will be no slackening of our job until the war is completely won.
