Are you really too busy to have a thorough health checkup once a year? Or do you keep putting it off because you’re afraid your doctor might find something wrong?

If it’s cancer you’re worried about, just remember that, thanks to medical progress, doctors are curing many more cancers than they could ten years ago. In fact, 800,000 Americans are alive and well today, cured of cancer...many of them because they had made a habit of having annual checkups no matter how well they felt...all of them because they went to their doctors in time!

Make annual checkups a habit...for life!
