What's ahead for you ... after you join Western Electric?

Anywhere you look—in engineering and other professional areas—the answer to that question is progress. For Western Electric is on a job of ever-increasing complexity, both as the manufacturing and supply unit of the Bell System and as a part of many defense communications and missile projects. These two assignments mean you'll find yourself in the thick of things in such fast-breaking fields as micro-wave radiorelay, electronicswitching, miniaturization and automation. You may engineer installations, plan distribution of equipment and supplies. Western also has need for field engineers, whose world-wide assignments call for working with equipment we make for the Government. The opportunities are many—and they're waiting!

You'll find that Western Electric is career-minded... and you-minded! Progress is as rapid as your own individual skills permit. We estimate that 8,000 supervisory jobs will open in the next ten years—the majority to be filled by engineers. There will be corresponding opportunities for careerbuilding within research and engineering. Western Electric maintains its own full-time, all-expenses-paid engineering training program. And our tuition refund plan also helps you move ahead in your chosen field.

Western Electric's needs include electrical, mechanical, chemical, civil and industrial engineers, as well as men in the physical sciences. You can get more information about Western Electric—and its many current needs for technical people—by writing College Relations, Room 2000, Western Electric Company, 195 Broadway, New York City 7, N. Y.
