Our business is generating and serving you with electricity. To meet this obligation requires a tremendous investment in property and generating facilities. You benefit from these investments by having an abundant source of dependable, low-cost electricity and by the ad valorem taxes we pay on our property and improvements.

The biggest portion of ad valorem taxes goes directly to the local school districts and last year our support to schools amounted to $5,665,127.69. OG&E's 1967 school tax payment would have paid for the education of 11,561 students enrolled in secondary schools, based on Oklahoma's average investment of $490 per student. This is an added benefit you receive from OG&E which is an investor-owned electric company.

Of course, our school tax payment is a cost of doing business, just the same as wages and generators. It is an expense which we must pay to remain in business. But of all our various taxes, we pay our school taxes most gladly because they are our investment in a better future...

ELECTRIC SERVICE

Your key to the WORLD'S LARGEST LABORATORY

Unlimited opportunities... challenging and diversified assignments with the prime contractor at the Nevada Test Site. Investigate immediate openings now in Engineering, Data Processing, Maintenance, Construction, Logistics, Accounting, Industrial Safety, Personnel, Radiological Sciences, and Management.

REECO is your key to the world's largest laboratory... 1350 square miles at the Nevada nuclear testing ground... and your key to the future... now!
