Read about this new kind of service to Europe

LOW COST TRIP TO EUROPE! They said it couldn't be done... with two-bed rooms; hot and cold running water in every cabin; delicious and abundant food; the unrestricted use of the ship with its spacious decks, verandas, cafes, and recreation rooms; and it could be done at the lowest rate on the Atlantic (New York-Havre-Antwerp). Would you like to read some of these letters? May we tell you about it?

AND your car can go along in the ship's garage at the lowest rate on the Atlantic!

That's the economical way to explore Europe, and a great way to save on your vacation. You will see more and pay less if you take your own car. May we tell you about it?

Ask your agent, or write to us:

ARALD BEERwen LANE, Dept. 73
11 Battery Place, New York, N. Y.

YES! Tell me about the new kind of service to Europe.

A) Passenger (the low cost way)
B) My car (the lowest rate on the Atlantic)

Streeter S. Stuart, '32as, is teaching Spanish and social sciences at El Reno high school.

PETROLEUM ENGINEERING

(CONTINUED FROM PAGE 132)

A doorway has been built on the north side of the second floor, and a walkway on the refinery tower and the laboratory constructed between the run-down house room. This eliminates the necessity of carrying samples down the refinery stairs, through the building and upstairs to the testing laboratory.

The instrument room is being made over by adding inclined shelves which carry sawed-out sections to fit the various pieces of apparatus and glassware.

Cutaway models and the like have been secured to build a typical Oklahoma City Christmas tree. This will be assembled at the front of the building south of the walk. A circular type cellar will be used. Just north of the walk an electrically operated Lufkin pumping unit will be installed. Doctor Huntington and Professor Bennie Shultz are planning to install a small cracking unit just west of the refinery superheater.

A decided increase in the enrollment in the petroleum engineering school was noted this year. The student body is well represented in the engineering honor societies and takes a great part in outside activities beside holding a scholastic standing well above the average. Last fall the Petroleum Engineers club was organized. This meets twice a month to study and discuss papers given by students and men in the industry. The club is affiliated with the American Petroleum Institute and the American Institute of Mining and Metallurgical Engineers.

With these and other improvements planned for the future, the faculty and students of the school of petroleum engineering mean to hold the prestige of the finest petroleum school in the country if not in the world.

"The Adding Machine"

The fourth Playhouse presentation of the year will be Elmer Rice's "The Adding Machine" scheduled for March 23 and 24 in the University auditorium. The fantasy will be directed by Larry A. Haydon and will include a cast of twenty-five dramatic art students.
