The university's budget

Two significant features attach to the budget submitted to the state legislature for the support of the university for the next two years. For the first time, the budget of the university is itemized, and the legislature will vote, if the itemization is retained, on each departmental appropriation. New no buildings are allowed in the budget as submitted. However, considering the financial stringency of the state, the budget on the whole, if adopted, will enable the university to continue its work without serious disruption. Practically all of the budgetary items for salaries and maintenance are the same as for the preceding biennium; and while they will not permit increases in salary or expansion in the work of the school, yet they should enable the university to meet its obligations to the state. Senator Mack Q. Williamson, ex '15, of Pauls Valley, President Bizzell, Regent John Carlock and Dr W. E. Grisso, of Seminole, president of the Dad's association, conferred with Governor Murray and the governor indicated that the budget as submitted was generally satisfactory to him, except in the matter of physical education which he wanted reduced. This the university did, reducing its physical education staff by half.

With certain minor changes, the budget was approved February 10 by the joint senate-house appropriations committee.

The total appropriation for the university per annum as it goes to the house is for $1,551,590. This does not include $106,184 for the school of medicine and $317,455 for the university hospital. The course of the bill now is for the house and senate to vote on it. The budget is not assured as yet, for any individual item may be removed in either house.

Governor Murray announced that he preferred removing the university hospital from the control of the board of regents of the university, after, he said, he had been informed that certain physicians were not admitted to practice in the hospital.

"What does the board of regents know about running a hospital? Another reason why I believe the hospital should be removed from control of the board is that any flareup at the hospital reflects on the state university," Governor Murray declared.

Co-operating with President Bizzell in the presentation of the budget were Mr. Williamson, Dick Cloyd, '29 law, Cleveland county representative, Mr Carlock, Regent Joe Looney, '21 law, Dr W. E. Grisso of Seminole, president of the Dad's association, E. R. Klaetli, ex '17, secretary of the university, Association Secretary Cleckler, Fred Tarman, '10 arts-sc, editor of the Norman Transcript, Earl Foster, '13 law, supreme court commissioner, and other alumni.

about them. Bartering over price is not an insult, but questioning the quality of the wares is. In fact, although generally cruder than the exquisitely handwrought brass of Persia or Syria, the articles are for the most part made in lofts over the shops, where lathes machines are no doubt employed, but no mass production methods, and they are the nearest approach to handmade articles of everyday utility that are produced in this country.
The windows of the shops are tiny, as though glass were a luxury, but they glitter in the gloom with their overweight of display. The people in the streets wear European clothes, of course, but as though uncomfortable and somewhat strange. Their eyes often have that glint produced
