Loans with Real Estate as the Collateral— for six months or more

Sometimes a business or professional man finds himself in need of temporary funds and is at a loss to know what to use for collateral for a loan. Many are not familiar with the fact that The First National Bank and Trust Company readily makes short time loans with real estate as collateral. Such loans, at bank rates, may often make it possible to embrace a money-making opportunity that otherwise would be lost or to bridge an embarrassing emergency.

Not only in real estate but in stocks and bonds there is readily acceptable collateral for First National loans. When in need of a collateral loan be sure and consult first with one of our loan officers.
