GOVERNOR ALFRED E. SMITH belongs to the younger generation. He is a product of the modern age, with all of its color—its vividness.

His life has been crowded full of responsibilities of high position, and the success he has enjoyed compliments the new note which he has brought into the world of affairs.

Rising from the “sidewalks of New York” with a smile on his lips, which he still wears, he achieved high position in our modern life, and as the leader of a great party, he asks to be named President of the United States.

Governor Alfred E. Smith has been characterized as a “man of destiny”. America needs a leader—a pathfinder—a blazer of the trail to the high road that will avoid the bottomless morass of crass materialism that has engulfed so many civilizations of the past. Democracy offers one who has the will to win—who not only deserves success, but commands it. Victory is his habit—Governor Alfred Smith—“The Happy Warrior”.
