8,000 Management Opportunities!

That's right. There will be 8,000 supervisory jobs filled from within the Western Electric Company by college graduates in just the next ten years! How come? Because there's the kind of upward movement at Western Electric that spells executive opportunity. Young men in engineering and other professional work can choose between two paths of advancement—one within their own technical field and one within overall management.

Your progress up-the-ladder to executive positions will be aided by a number of special programs. The annual company-wide personnel survey helps select management prospects. This ties in with planned rotational development, including transfers between Bell companies and experience in a wide variety of fields.

Western Electric maintains its own full-time graduate engineering training program, seven formal management courses, and a tuition refund plan for college study. After joining Western Electric, you'll be planning production of a steady stream of communications products—electronics switching, carrier, microwave and missile guidance systems and components such as transistors, diodes, ferrites, etc. Every day, engineers at our manufacturing plants are working to bring new developments of our associates at Bell Telephone Laboratories into practical reality. In short, "the sky's your limit" at Western Electric.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information about Western Electric, write College Relations, Room 6104, Western Electric Company, 195 Broadway, New York 7, N.Y.
