The University R.O.T.C. unit became the second school in the Fourth Army to receive a quota for a postwar program, the largest enrollment the University has ever had in recent years.}

The program was developed in response to the demands of a postwar program. The University R.O.T.C. unit was authorized by the War Department. The unit was instructed to fulfill the demands of a postwar program, the largest enrollment the University had ever had in recent years.

The unit was given three distinct branches: field artillery, ordnance, and quartermaster. The student plan was designed to include 200 students, all of whom were enrolled in the course, and approximately 200 students were enrolled in the course, and approximately 200 students were enrolled in the course.

The Naval Reserve Officers Training Corps and the Army Reserve Officer Training Corps units at the University got underway the first week of school. At the first Army drill period, over seven-hundred cadets, the largest enrollment the University ever had, was present, and the colonel, assisted in his duties as commanding officer and professor of military science, summarized the drill plans for the future.

The colonel outlined plans for the future, which included study of late war developments, the Navy program, inasmuch as there is but one student plan. All students who are enrolled in the program are working toward a reserve commission in the Army.
