president, J. C. Penney Co., and is located in the New York offices of this company at 330 West Thirty-Fourth Street.

If you were a really serious member of your class you will remember that Richardson served as your president during both your junior and senior years. That he was a member of the glee club for four years and its president during his senior year. That as president of the Business School club he became head of Lambda chapter of Alpha Kappa Psi when it was installed at the university. And that he went from graduation into the army during the very exciting year of 1917.

What you perhaps haven't heard of is Richardson's activities since the armistice for he has spent all of that time in the east. The Harvard graduate school of business administration claimed him in 1919 and after leaving it he became a research assistant in the New York Federal Reserve Bank.

Banking held his interest but a short time and he soon became director of research for the Atlas Portland Cement Co. While working for this company he held the secretarialship of the Harvard Business School club of New York for two years.

For the past three years Richardson has been connected with the J. C. Penney Co. His progress during this time may be measured by the fact that on the first of this year he was made assistant to the president and has more recently been appointed assistant director of public relations. He is now thirty-three years old.

His present responsibility of helping to promote good will in every community where the Penney stores are located is one of true magnitude but he finds time to be in addition an active member of the Harvard club, the Western university club of New York and the Braidburn country club.

R. R. Bloss

"Vice-president and general manager" is a title which may mean much or little. Attached to a business man who operates a single business in a small town it may be totally unimportant but when it is used in connection with a company which maintains ware house facilities in twenty-two cities of the United States and foreign countries it is indeed of significance.

"Vice-president and general manager of the International Derrick and Equipment Co." written after the name of R. R. Bloss marks him then as one of the most successful ex-students of the university. Bloss attended the university during the summer of 1910 and the year of 1911. Though he did not stay long enough to graduate he writes enthusiastically that he was "one of the first students to enroll in the college of mechanical engineering which at that time was under the direction of Prof. James H. Felgar."

He was one of the pioneers of the school in aviation interest for he left school in 1911 to join the engineering corps of the Curtis Airplane and Motor Manufacturing Co., at Buffalo. He studied the mechanics of the planes until he fitted himself for assistant chief engineer and became associated with the Standard Airplane Co. of Plainfield, New Jersey.

The declaration of war caused his assignment to the United States Army Airplane Experimental and Development station at McCook Field, Dayton Ohio. Here he remained until late in 1919, working on development projects in connection with military planes and airplane propellers.

At the end of the war Mr Bloss left aviation to enter the oil well supply business and early in 1921 became chief engineer of the International Derrick and Equipment Co. with offices in Columbus, Ohio. Today he is vice-president and general manager of the company. In this capacity he directs the manufacture of oilwell derricks, standard rigs, rotary drilling rigs, oilwell drilling and pumping accessories and equipment, a complete line of standard steel sectional buildings for railroads, electrical power, aviation and other industries; airplane hangars, beacon light towers, floodlight towers, airway light towers, transmission towers, radio towers and substations. The plants manufacturing these accessories are located at Columbus, Ohio; Torrance, California; and Beaumont and Houston, Texas.

The future of South America in the oil industry is demonstrated by the large volume of trade which Mr Bloss does with Venezuela, Argentina, Colombia, Peru and other South American countries.

Business necessity recently caused Mr Bloss to make a trip to Colombia and he tells of his impressions of that country. He was amazed at the fact that the first automobile on the streets of Cartagena, a city 400 years old, was brought there about 1923. Since that date about 300 cars have been imported there.

A trip up the Magdalena river from the coast to the interior of Colombia on a river boat required six days to go 350 miles. Such a waste of time seemed futile to this modern business man and he made the return trip by airplane in three hours and forty-five minutes.

DEATHS

Mrs. Myrtis Modrall, ex '24, December 4 in Mangum. Mrs Modrall had been teaching school in Nocona, Texas. She is survived by a daughter and by her mother, Mrs. W. D. Young.

Mrs. Mabel Arnold Smith, '16 arts-sc., April 17 in Detroit, Michigan. She is survived by her husband, Wayne Smith, her father, her brother Marion, '23 chem., and her cousin, Rosetta Briezel Barton, M. A. '16.

NEWS OF THE BREADWINNERS BY CLASSES

1906

Walter R. Jarrett, '06 pharm., is a successful believer in the theory that it takes two professions to keep a man busy and happy. Jarrett was one of the first organizers of chain drug stores in the state, served as secretary of the state board of pharmacy for eight years and was president of the national board of pharmacy. Then finding pharmacy left too much time on his hands he began buying and selling leases and royalties. He now has about 47 tracts of royalties and leases in Oklahoma county aside from holdings elsewhere in the mid-continent field.

1907

Roy J. Wolfinger, '07 arts-sc., (M. A. '16), is a professor of English in Phillips university at Enid and finds his chief interest in his comedy class. This class has written, staged and played nineteen dramas, seventeen of which have been under the direction of Professor Wolfinger.

1908

Frank M. Long, '08 arts-sc., ('09 M. A.) is director of the Y. M. C. A., or the Associacao Christa de Mocos, as it is known in Porto Alegre, Brazil.

1911

P. W. Swartz, '11, is serving his third year as professor of economics and business administration at Oklahoma City university. Other members of the university faculty at Oklahoma City are E. M. Castleberry and C. M. Allen, both former students at Norman.

1914

William Aitkenhead, '14, is living at 120 Marstellar street, W. Lafayette, Indiana, and is professor of agricultural engineering at Purdue university. Aitkenhead is the father of three sons, all of whom are now living in different parts of the world. William C., is a chemist with the Norwegian Zinc Co. of Odda, Norway. Paul is a mechanical engineer with the Bucyrus Co. in India and Robert is working for the International Telephone Co. in New York City.

1915

Mrs Josephine Lawhead Hunkapillar, '15, is serving her second term as president of the Pampa, Texas, branch of the American Association of University Women. Her home is at 401 West and Browning, Pampa. Dr. A. B. McConnell, '15 medic, is practicing in Burlington, Kansas, and reports that the Sooner medical banquet in Kansas City during the annual fall clinics was attended by six O. U. graduates.
Rego

A few years ago welding was introduced to the world. For a time this art was looked upon as impractical. Today, however, it is considered a necessity. Thousands of plants use it for maintenance work while others find it a great saving in manufacturing their product.

The name REGO has been associated with the welding industry since its introduction in this country. We stock this equipment and maintain a repair department.

The IDEAL CHRISTMAS GIFT

Give your friends memberships in the University of Oklahoma Association. The Sooner Magazine every month (except August and September) will bring to them in bright, attractive style, the news of Soonerland and of Sooners everywhere.

No gift for the money will bring as much pleasure. Three dollars pays for a membership—one dollar for the association and two dollars for the magazine. Membership will include the biennial Alumni Directory.

For further information write to Frank S. Cleckler, secretary.

UNIVERSITY OF OKLAHOMA ASSOCIATION
OKLAHOMA UNION BUILDING, NORMAN, OKLAHOMA.

with offices in Memphis, Tennessee, and in the Southwest Bank building in Oklahoma City. The firm does civil engineering, city planning and landscape designing and has been retained as consulting engineers to the Memphis Harbor commission, working on the development of the Memphis harbor and Mississippi river.

Dr. Webster Majors, '20 sc., has recently been married to Miss Henry of Bham, Alabama, where he is practicing. His offices are in the Comer building.

W. W. Milam, '20, and Mose Endicott, '22, are working in the field land department of the I. T. I. O. Co. in the Oklahoma City district.

1921

Mrs. Bess Mills Bullard, '21, is now living at 803 West Thirty-first street, Austin, Texas. Fred M. Bullard, '21 geol., is associate professor of geology and mineralogy and has been appointed chairman of the department of geology of the University of Texas for the coming biennium.

A. Roger Denison, '21 science, (M. S. '25), who has been division geologist for the Amerada Petroleum Corp. at Fort Worth for the past two years was elected second vice-president of the American Association of Petroleum Geologists last March. Denison is also serving as vice-president of the Fort Worth Geological society. He was married October 8 to Miss Maud Espy at Timpson, Texas. Denison is a member of Kappa Alpha and Sigma Gamma Epsilon.

1923

Mme. Pierre Kressman (Alice Gilbert '23) is now living in Bordeaux, France. M. and Mme. Kressman were married on July 10 in Toledo, Ohio. They spent their honeymoon in a motor trip which included Chicago, Canada and the east. After they returned to Bordeaux they also motored through Switzerland and France.

Mrs Helene Brasted Godwin, '23 arts-sc., and Mr. Godwin, who have been living in Fort Worth, are now at home at 1136 East Nineteenth street, Oklahoma City.

1924

Ethel Cousins, '26 arts-sc., is teaching in Glen Cove, Long Island, New York.

Bruce B. Potter, '24 law, is county attorney of Kay county, with offices at Newkirk. He is also a member of the firm of Potter & Potter, of Blackwell.

NAPLES UNDER MUSSOLINI

(Continued from page 93)

this group education. If Mussolini and his régime are spared long enough for these children to reach maturity, the foundations of the new Italy may be regarded as established.

Among the educated Neapolitans with whom we spoke, the fear was often expressed that some disaster might occur before Mussolini's successors have been thoroughly schooled. This was the only cause for apprehension that we discerned among the acquaintances made in Naples. It is feared that if an assassin's bullet should remove Mussolini, as has been at least four times attempted, revolution would result. If he lives, however, to see the education of a single generation complete, serious calamity can scarcely overtake Italy.

The reason for our three months in Naples was that we might study certain Mediterranean forms of animal life which are not available in America. The Stazione Zoologica was founded in 1872-74 by Dr. Anton Dohrn and under the patronage of the German government rapidly became the foremost institution of its kind in the world and the most profound influence upon zoological science of the closing century. It became the ambition of every zoologist of America to spend a season at Naples. Of course with the World War, the old relationships of the station were broken and for a time support was very doubtful. Dr. Reinhardt Dohrn, who succeeded to the directorship of the laboratory upon the death of his father in 1909, was able to guide the institution through the difficult times and at length secured enough financial support to maintain it from the Italian government, various scientific societies, receipts from occupants of the research tables, and especially from the daily admissions to the great aquarium which is run in connection with the laboratory. The coming of fascism has had little direct effect upon the laboratory other than to require that all heads of departments should be of Italian citizenship. Life at the station now is quite normal and a happy one indeed.

See Naples and then die? Not now, see Naples and then come again and enjoy its beauties and charms.
