

W.B. and another man went up about sundown and found what way they were going to go and what way they were going to leave. So they went back to camp and started out and went two cross the river after dark, they crossed the river a narrow part of the way and when they got close to the camp I turned back and the when they got close to a big tepee and I more turned back. The two rested how they was with W.B. so the crowded almost up the camp and then they stood up and walked in the shore that were tied out in the center and they picked out two horses and walked out with them they walked all the way back to their bags the reason they did not ride was because the one how boys horse was wild after they got back to the other boys they decided to go after the horse that were out to graze and W.B. got a pure white horse this time and they were running away the horse his reason

played out and he got on this white horse and the thresher turned but the 2nd time he staid on and they went on and another mans horse played out and they stopped and were all afraid and they all ask W.B. to rope a horse and he did and it was the first that W.B. got in camp when they started on W.B. pile horse gave out and he caught one and himself and but he was wild so they choked the horse down and held his ears while W.B. got on. after a while another mans horse gave out so W.B. had to rope another horse and this time he got a bald face horse these were W.B. horse after he caught them it was not much longer until fall in the Shim's horse gave out and they yell at W.B. to catch another horse but W.B. told them to get their own but they had to carry his rope and W.B. stopped the had and the same thing happened the next few minutes. By this time it was day light and they rode all that day the next morning early they found some buffalo and W.B. and another man went after some W.B. was on
