

N. Y. Zoological Soc.

New York Zoological Park

UNDER THE MANAGEMENT OF THE

NEW YORK ZOOLOGICAL SOCIETY,

185th St. & Southern Boulevard

WILLIAM T. HORNADAY, Sc. D.,
DIRECTOR

New York, May 10th, 1910.

Mr. Walter S. Campbell,
The University of Oklahoma,
Norman, Okla.

Dear Sir:--

Your letter addressed to Dr. Hornaday has been handed
me for reply:

1. Calves are usually born in April, May and June.
2. Bison sheds its coat during April, May and June.
3. Regains full pelage in October.
4. The herding or rutting season is during September, October.

A bison cow usually gives birth to a calf every second year,
although occasionally one will breed yearly.

Yours very truly,

W. REID BLAIR,
Veterinarian.
