"A Wail from the Weat"
The following letter from "Little kuddy", weat Missouri Slope, is interesting to say the least: Editor, Tribume:- I have the pleasure of Writing to you to give a statement of the condition of the crops. There has not been any rain here since the first of Jume and the exops will be a complete failure. The grasshoppers did const derable damage in the early part of the seascn, and the drought and hot weather destroyed the bel ance. Prairie fires are raging in all eections and there are no signs of rain. Cattle men are coming in with herds and are looking almost in vain for small patehes of grase to cut for the winter; end fasmers will cut some of their grain for hay, leaving the remainder on the field.

There was a shooting affray here on the 13 th; a half-breed named "Parky" Ward being shot in the mouth with a 38 -calibre revolver, the ball lodging in his neck. The shooting was done by ALLISON, the Scout and interpreter, who brought in sitting Bull.
